

## Barber-Nichols Kelvin Series Cryogenic Circulators Offer:

- Ideal for helium applications
- Vertical design for cold box installation
- Rotating assembly removable for maintenance
- Working Fluids: Air -Ar -H<sub>2</sub>-He - Kr -N<sub>2</sub> -Ne -Xe- and others
- UL/CE/CSA certification options
- Wide range of performance suitable for gas or liquid
- Optimal efficiency
- Low heat leak
- High reliability
- Process fluid temperature range 350 K to 4 K
- Hermetic design-no rotating seals
- Welded connections
- Inverter duty motor
- Motor thermal protection options
- Hybrid ceramic bearings
